Light and shadow bounce off of Beam in a playful dance. Built for the most design-forward of spaces, this new NappaTile pattern comes in a selection of luminous, shiny, metallic, and neutral colors. Each handmade rectangular beveled tile will add depth and accents to any vertical surface and create a sleek, modern look.

An instant classic, think of Brick as simple building blocks
for your versatile set of designs.

Taking on the shape of a brick, these padded and unpadded tiles
are soft to touch, and come in solid and vibrant colors.

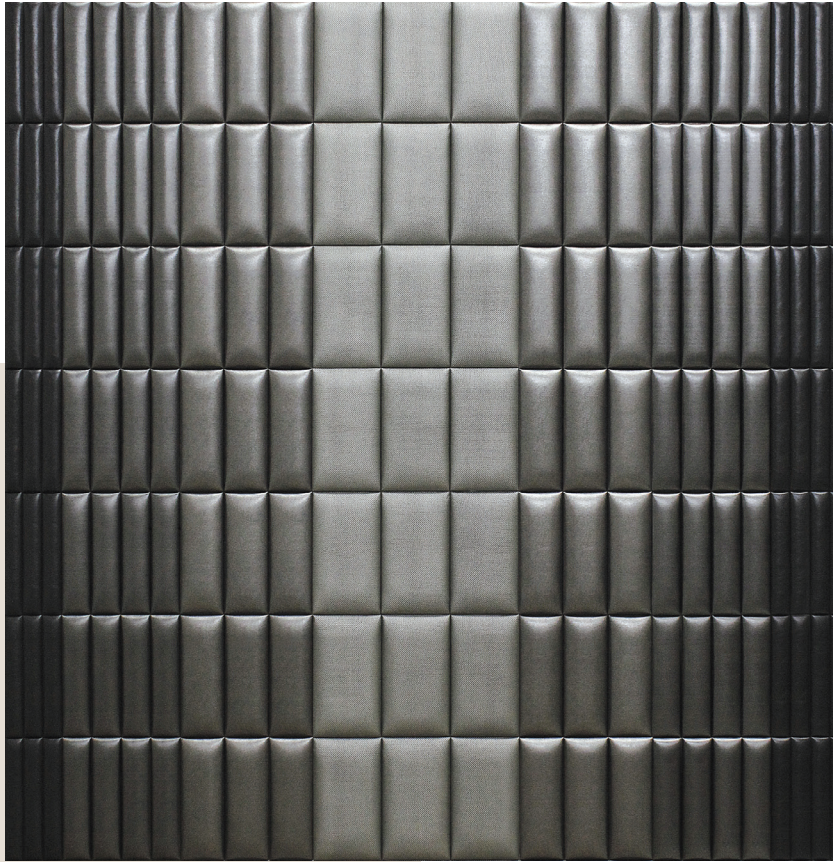

So go on, get building.

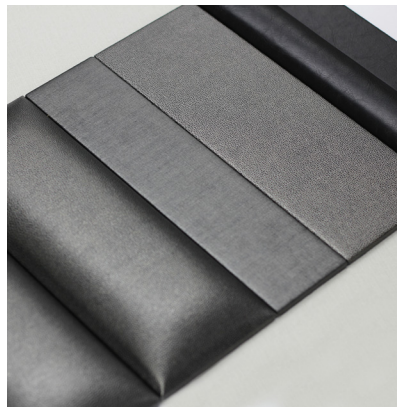

The Chevron print dates back to 1800 BC signifying eminence and strength. This padded chevron pattern projects assertively from the wall, combining poise with classic design.

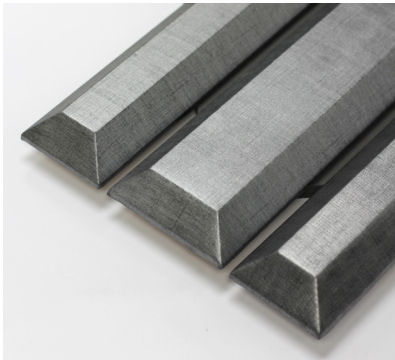

The light colors at the crest swell high and free to a crescendo until the current crashes down onto the thinnest of darker tile hues. These waves are repeated and stretched showing the ebb and flow of the ocean.

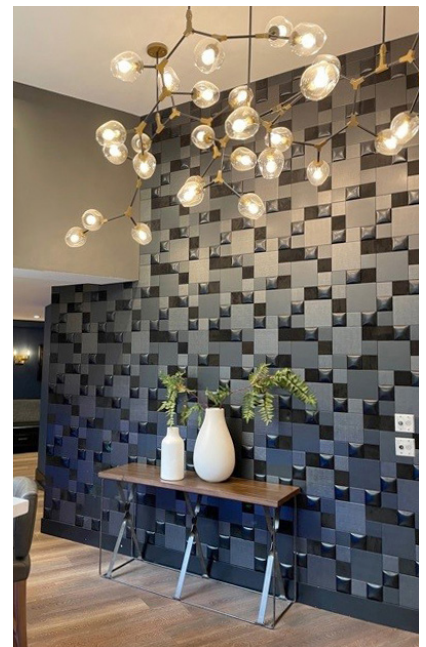

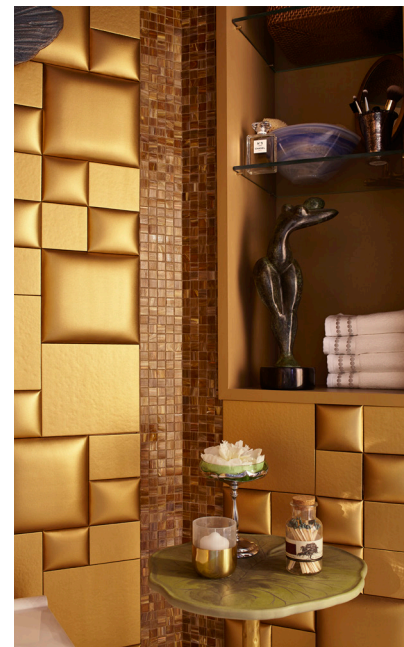

Metro

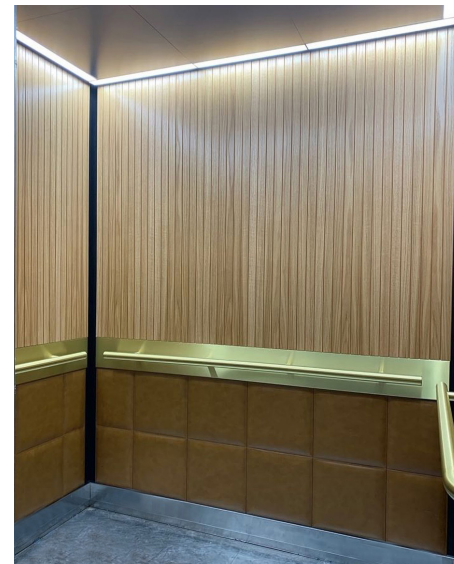

Inspired by the linear railways of busy metropolitan areas, these dimensional tiles create unwavering structure and depth to any space. The tiles can be connected to elongate the wall vertically or horizontally.

Muse

Enhance any space with the addition of stitching along the tile edges to create an elegant and classic appearance.

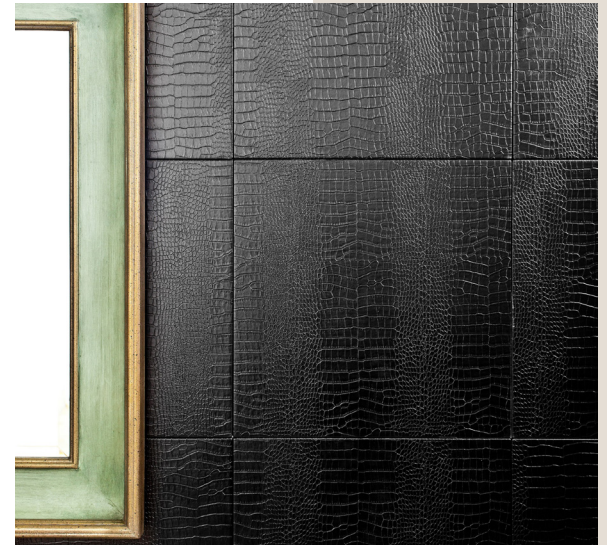

Thread colors can be custom selected to either match or contrast with the covering fabric.

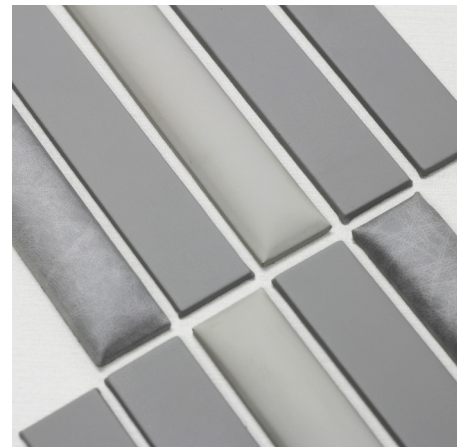

Origin - Padded

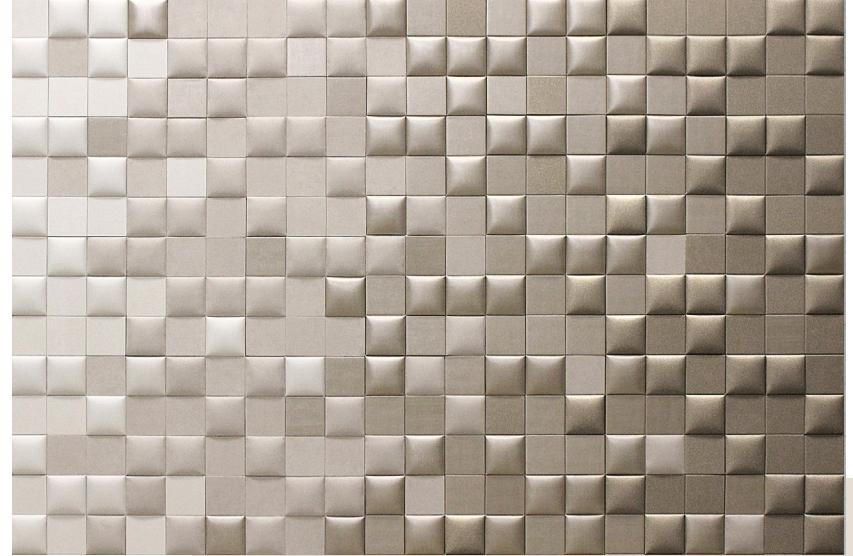

*NRC: 0.25 - 0.60

Origin - Regular

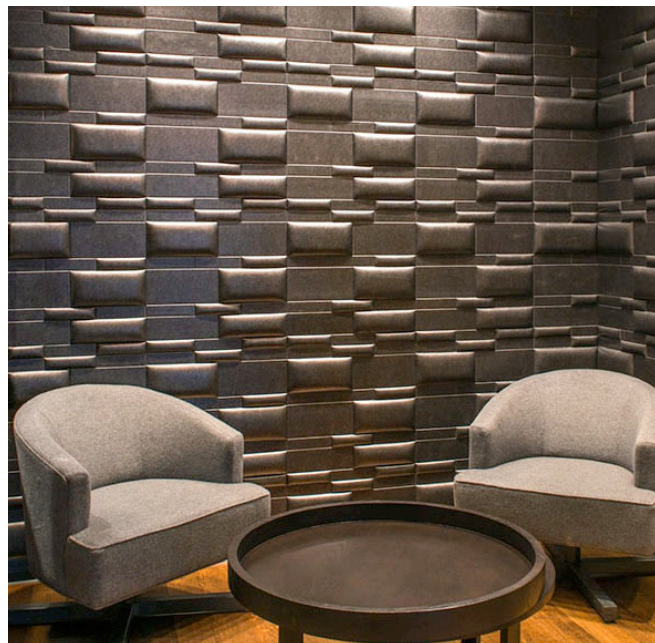

Spectrum encompasses the gentle dispersion of lighter and darker tone colors. The seamless transition is subtle due to the soft, unifying link between all the pieces.

Titan

Trifecta

*NRC: 0.20 - 0.35

Zipper

*NRC: 0.20 - 0.60

Binding together multiple design elements, Zipper uses narrow padded and regular tiles to fasten a wonderfully eye-catching accent design on any wall.

Padded Tiles

**NRC Rating: Value ranges based on selection of standard or acoustical coverings. When all padded tiles are used, regular coverings will provide acoustics as well.*

Does NappaTile have acoustical properties?

Yes, NappaTile offers products with acoustical properties. The NRC rating increases when paired with acoustical coverings.

Are all patterns acoustic?

All patterns consisting of padded tiles will provide acoustical properties. However, the NRC rating will range depending on the proportion of padded tiles used in the design.

How can we achieve the highest sound absorption?

Using our acoustical coverings on padded tiles will provide the highest sound absorption at 0.60 NRC.

Can patterns be customized to increase acoustical properties?

Yes, we currently have four acoustical coverings available - Como, Ostro, Pebbled, and Sirocco. Standard patterns can also be customized to increase the amount of padded tiles in the layout.

Has NappaTile been tested for sound absorption?

Yes, the tiles have been tested for sound absorption, and reports of the results are available.

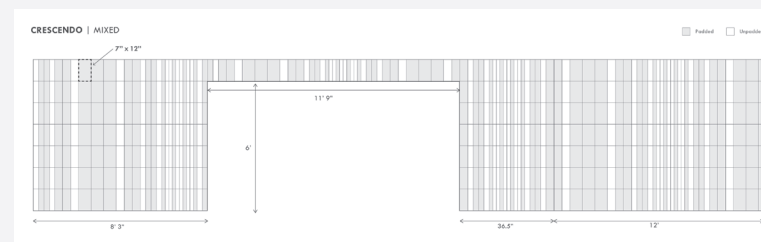

Contact your local sales rep or customer service for more information.

Design Services

Rendering

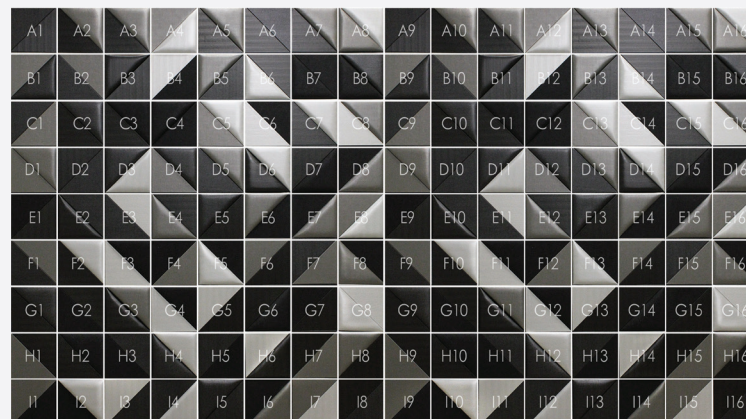

Simply provide wall dimensions and preferred pattern to the NappaTile team to receive renderings. We can provide recommendations for custom sizes along with any other adjustments necessary to fit the tiles onto your wall.

Inquire about this complimentary service by reaching out to your local sales rep or customer service.

Installation

Contractors will receive an easy-to-follow installation layout made custom for their project. Tiles will be labeled on the backside with a code corresponding to the installation legend.

Specification

Size: From 2" x 2" to 42" x 42"

Flammability: ASTM E-84 Class A (Adhered)

Installation: 3M Peel & Stick or Direct Glue

Covering: Curated options from vegan leathers, faux suedes, and wovens

Padding: 100% FR Polyester

Base: Magnesium Mineral Board or 100% Recycled Wood

Customization

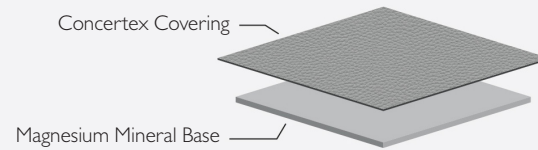

The designs in this book are just a starting place for inspiration. Design possibilities are endless with our broad offerings of patterns, coverings, and colors. You can use the wall as an empty canvas to create your own work of art.

Please contact your local sales rep or customer service to begin your custom job.
